- HSC in State Board in 2011.
- SSC in State Board in 2009.

Technical Profile:

SKILL	EXPERIENCED	AWARENESS
Programming Languages	JAVA 8.0, NodeJS	C++
Operating Systems	Windows 7/8/10	Linux(Basic)
UI Technologies	Html, JavaScript, Ajax, CSS , XML , AnjularJS, Angular6-7	-
Database Softwares	Oracle 11g, MySQL 5.0	MS SQL Server
JSE Technologies	JDBC, Applet, AWT, Swing.	Desktop Application
JEE Technologies	Servlets, JSP.	
Servers	Tomcat 9.0, Glass Fish 4.0	WebLogic 12c
Frameworks	Spring 3.x/4.x, Springboot	
Spring modules	IOC,DAO,AOP,MVC,ORM	
SOA(Web Services)	Restful	(Basic)
Tools	Log4J, Maven, Gradle, SVN, GitHub.	

Project Profile:

Project#1   **Jan 2019 - Till Date**

Title   : **Living Media Project (Web-portal)**
Client Organization   : India Today, Noida-Delhi.
Environment   : AngularJS, NodeJS, JDK 1.8, Spring2.x, MS SQL Server , Eclipse Oxygen, Visual Studio code, Maven , Postman and etc..
Team Size   : 3
Role   : Software Engineer.

Description   :

            We have develop web portal for News Channel (Live Media) in Angularjs , Every news channel has large multi-media content are stored for news, in that 'photos, PDF, RTF, html, txt file' are there, This new media channel uses one Content management software like 'Quark'. On the top of Quark we build one web portal for easily search photos, PDF, News-story on this portal. There are many system connected to each other in the same server/Domain. Portal basic requirement is searching filters & user-friendly UI & display metadata, get each updates from Quark system when

user check-in assets. It also shows image gallery view for given search and we provides plugins on this portal in that 'shopping-cart' for selling images, 'content comparisons' for story writing, asset add as a 'favorite', 'share option' for sharing content on social websites. This application works completely in an offline mode.

Responsibilities:

- Understand the requirements & design it, Interaction with Client.
- Used AngularJS , nodeJS and spring dependency injection.
- Designing and developing application, Defect fixing.
- Involved in developing reusable web services using SOAP, WSDL
- Resolving the production issues reported by the client users.

Project#2   **Nov 2018 – Dec 2018**

Title   : **Vyoms AI**
Client Organization   : Cisco product.
Environment   : HTML, javascript, JQuery, Css, AngularJS, JDK 1.8, Maven , Postman and SVN.
Team Size   : 3
Role   : UI developer

Description   :

         Every end users don't want to install whole application on system, it always prefer browser plugin. Same like that we have built one browser extensible plugin AI, It analyze users all daily activity and recognize what users wants according to that what action they has to perform. Just like Google Alexa. User gives instruction to Vyoms through chat or voice, according to instruction it do actions searching hotels, booking flights, paying bills, remembering banking account details, fix meetings with clients, recognize voice of user etc. activity of user maintain by Vyoms.

Responsibilities:

- Designing UI according to requirements.
- Develop Plugins for Chrome, Firefox browser.
- Used Html , JavaScript, JQuery, Angular JS .

Project#3 (Academic Projects)

Title   : **GYM Management (Desktop Application)**
Environment   : VB.Net, SQL .

Description   :

        The project objective is to reduce the paper work and maintain the customer information in database and also maintain the body growth improvement details. Security are provide only to the Administrator the can access the data or handle the system.
